DETAILED ACTION

Applicants' amendment dated 05/05/2006 has been received and entered. By the amendment, claims 1, 8, 23, 32-41, 54-55, 57, 59-61, 63 and 65-69 are remain pending in the application, wherein claims 54 and 55 stand withdrawn from consideration.

Claim Rejections - 35 USC § 102

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1 and 8 are rejected under 35 U.S.C 102(e) as being anticipated by Lien et al., US Patent No. 6,493,050.

The above claims are anticipated by Lien et al. figures 1A and 17 which disclose a liquid crystal display (LCD) device comprising:

- . a pair of substrates (102, 104);
- . a liquid crystal layer (101);
- . color filters (106);
- . a common electrode (122);
- . cell gap adjusting spacers (first spacer 108/602), wherein the cell gap adjusting spacers covered directly adjacent terminal edges of the color filters as well as formed over a black matrix (see figure 17);
- . domain defining projections (pretilt control structure 114/606) as claimed.

Allowable Subject Matter

3. Claims 23, 32-41, 57, 59-60, 63 and 65-66 are allowed.

The following is a statement of reasons for the indication of allowable subject matter: none of prior art disclose, singly or combined, an LCD device having a plurality of spacers interposed between two substrates, wherein the spacers are formed to satisfy all condition as set forth in claims 32-33. Furthermore, pixel regions include both first pixel regions, in which a final protection film is interposed between pixel electrodes and a transparent substrate, and second pixel regions, in which the final protection film is not interposed between the pixel electrodes and the transparent substrate as set forth in claims 23, 32-34, 38, 57, 59-60, 63 and 65-66 as well as both the first and second spacers are formed over a black matrix formed on the substrate as set forth in claims 61 and 67-69).

Response to Arguments

4. Applicants' arguments filed 05/05/2006 have been fully considered but they are not persuasive.

Applicants contend that Lien does not show any adjacent edges of color filters at all, the post spacer 602 only covers overlapping portions of the first color filter layer 504 and the second color filter layer 510, but the terminal edges of these two filters are not directly adjacent to each other under the spacer 602. The examiner respectfully disagrees with Applicant's view point since the spacer (602) does cover the terminal edges of the first color filter layer (e.g., 510/600 on left side) and the second color filter layer (e.g., 504/600 on right side) that are directly

Art Unit: 2871

adjacent (part of adjacent two color filters on the same level) as well as covers the overlapping part as shown in figures 16 and 17.

Accordingly, the rejection of claims 1 and 8 stand.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
